

7.3kW

THE

MCWC250 WATER COOLED SPLIT

Split systems offer the most efficient and effective form of portable air conditioning available. From a standard 13a supply the MCWC250 water cooled split delivers a huge 7.3kW of whisper quiet cooling that can be sited up to 35m away from the heat exchanger making it an ideal solution where ducting warm air away is not viable. With flexible water pipes that use easy fit quick couplings that anyone can use it also removes the need for complicated long run refrigeration pipes with all the associated problems, expenses and down time. As usual these units come with the outstanding build quality and rugged design that are our hallmarks, easy to use controls and a catalogue of accessories including spigots for ducting cold air delivery into hot spots or to cool multiple areas.

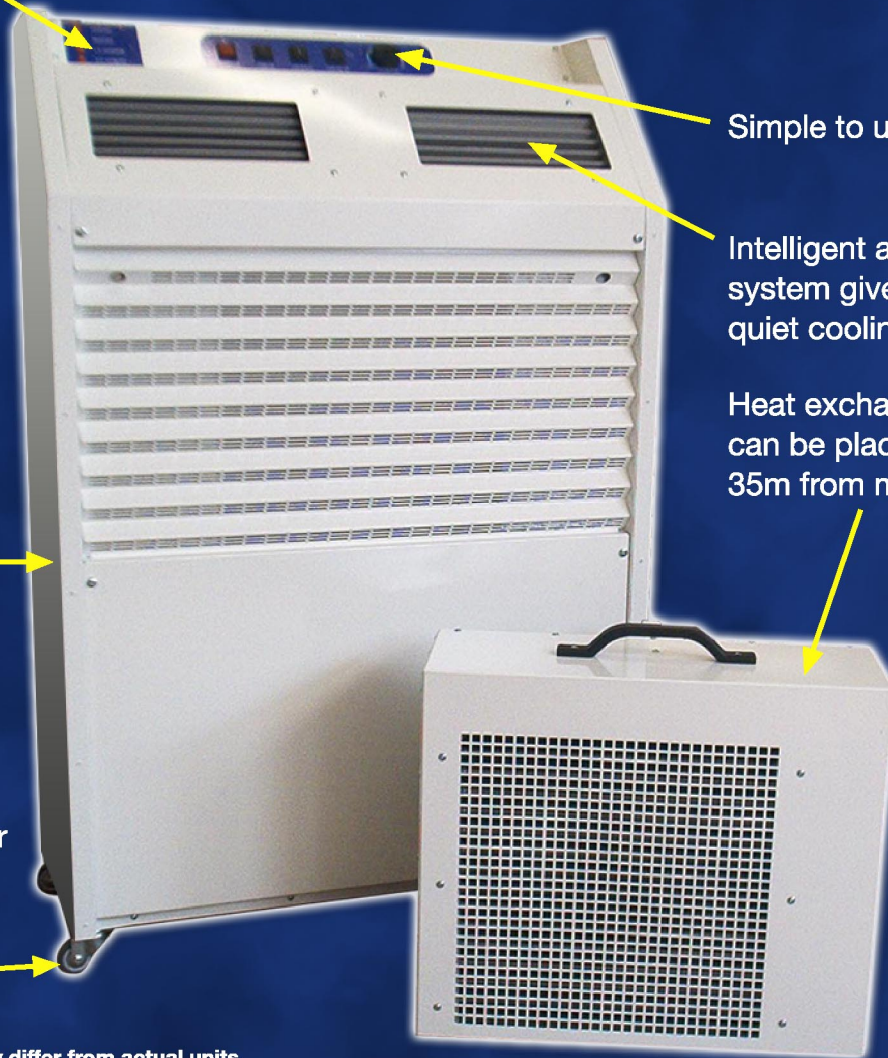

Status panel lets you know exactly what's happening

Easy to use couplings can be installed by anyone, no need for braised joints or engineers.

Fully portable, just plug in and go!

Pictures for illustration purposes only & may differ from actual units

Simple to use controls.

Intelligent air delivery system gives whisper quiet cooling.

Heat exchanger section can be placed up to 35m from main unit.

- 7.3kW cooling duty
- Water cooled split unit
- Heat exchanger section can be sited up to 35m from main unit
- Whisper quiet operation
- Runs from domestic 13A supply

Nominal Running	11a
Nominal Air Flow	1450 m³/hr
Refrigerant	R422d
Nominal Noise	58.4dbA
Weight	86kG
Standard Operating	21°C-40°C
Weight	106kG
Main unit size (HxWxD) mm	1350x820x380
