Rutland 503 Land Tower Kit

Rutland 503 Land Tower and Rigging Kit

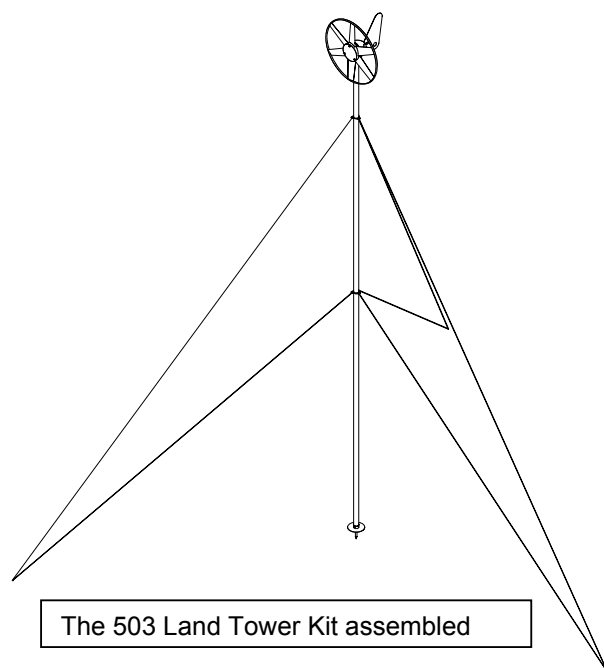

Ideal for touring caravanners this kit offers a quick and easy way to temporarily mount the Rutland 503 when parked and get charging the batteries without delay. When on the move the 4m overall high tower is dismantled for convenient stowage. The Rigging Kit is offered separately to enable it to be used by customers adapting locally obtained poles. Care should be taken to install the kit in suitably firm terrain.

503 Land Tower Kit – the kit is made up of 2 x 2m long sections of stainless steel tube with a joiner and ground fixing spike. This must be supported by the 503 Rigging Kit.

Part No: CA-12/12

503 Tower Rigging Kit – the kit consists of 2 sets of 3 guy wires ready fitted with tower attachments for upper and lower sections, shackles and ground anchors. The guys are made of polypropylene covered galvanised steel and all steel components have a weather protection finish.

Part No: CA-12/13

910 Series Land Tower and Rigging Kit

The Land Tower Kit and Rigging Kit is designed for permanent installation of the Rutland 913 and FM910-3 Furlmatic Windchargers. The 6.4m overall height tower hinges at the base for easy raise and lowering and should always be supported by the Rigging Kit. The Rigging Kit is offered separately to enable it to be used by customers adapting locally obtained poles.

Land Tower Kit 910 Series – this consists of 3 x 2.13m long sections of galvanised steel tubes with joiners and ready drilled to fit the windcharger and rigging kit fasteners.

Part No: CA-12/08

Tower Rigging Kit 910 Series – the kit comprises ground fixings for the pole and guy wires, steel guy wires, shackles and turnbuckles. The ground fixings should be secured in concrete bases appropriate to the terrain.

Part No: CA-12/07
